

Safety in the be or the bee  
April 6, 2008  
Joel Akin

Deuteronomy 6:3 Hear therefore, O Israel, and observe to do [it]; that it may be well with thee, and that ye may increase mightily, as the LORD God of thy fathers hath promised thee, in the land that floweth with milk and honey.

The be is the set of the heart while the bee is the honey. In the beginning there was a corrupt person who took be to the set of a lie. He built a dog and put it into a fish. The fish became wise as a dog. The dog didn't do well for it could not pee. Thus the fish went in large circles. That is the whale. It goes in long circles before finding a place to settle. Of course if people want DNA of a dog they do look in the place of DNA. Suppose the DNA wasn't filled up properly? Suppose the DNA were incomplete? Suppose God made it that way? Suppose each of us was meant to find the missing parts? Suppose the missing parts were the parts called gap in the record?

Such a thing would mean there had to be something which would fill in the gap. That was the bug. The bug is the only one of all the parts of creation which was meant to be healing. By bug I speak of those things that now make us sick. They were sick things to some but God made them small. He made them so each was numbered. For example HIV is the source of much misery. It was the bit of knowledge for the body. Knowledge meant to heal.

Now if that offends it is because you have a small link. A small link is when your brain isn't able to read anything without thinking "I'm offended". Thus when the bit of fluff in the wind we call pollen is hitting your synapse it is also checking your DNA. It wants to know what else your body needs. Then if it is in need of something you can then go out and begin to adapt it to your DNA.

The amount of change needed is often small. It takes one little bit and that is the bond to fit the bond of the DNA. However there came a problem to man and it was the bit of bond was broken in its nature. It lost cohesion and that part of the body went out and multiplied. Creation was divided into three parts and those were like bacteria or virus or maybe eucaryotes. Lets say there were three kind of teaching that was left in the earth long ago. Men had it in them but threw it off when they were found to flow in the gift of the Holy Spirit. They didn't know the body had it as a defense.

The point is everyone is the sea of time. Time is that few will read this with utmost concept or understanding. Man has a gift which is rare and that is the future. In the future when man is ready he will achieve lift off with the bend of knowledge. Thus if I can find the way to it knowledge is of things that we desire. It is the potential of Houdini and the leverage of Samson only with understanding. Whatever we focus on will lead us to truth and we can grow in that truth by finding the bit of life that fits us specifically. Knowledge is such that which isn't wanted will carry away. It will have a tough time in the future finding a home for the will of a person.

Finally God will carry the way to the bee to those who want it. It is the way of a be in the free and the full. It is the way to life. It is the way to overcome the exhaustion which hits all men when in battle.
