

The spiritual cure for life diseases part one
March 23, 2008
Joel Akin

The will of the bore is to steal. The bore is the bit of tiny microbes that fill the blood. They fill it with a tiny pinprick of time and life.

Each microbe is a bot. A bot is a little bit of flesh in the body. The body is infiltrated by zillions of tiny bots. Each one is life and life is the seed and the life to things not seen by us in the body.

To overcome we have to find life. Life is all around. Yet in the body of life it is the key to space. Space is the bit of time that is processed through the tiny pore of the bit or bot. If we were to find ourselves that size all the world would be a very strange and ugly place. For things would not have portion or proportion to it. Thus the part of it which is why we are here is to see.

Each part of us is given a gift called time. Time is a bit in a bot. Each bot is the portion of life which is given us. If we had a cancer it would give itself a name of fat and adipose as lump of something. It would grow and it would nourish its own before giving to another part. This is the seed and the fish nature of its heart. For each cancer has a heart. Each part of the cancer is met with resistance to each part of the store and the house.

The purpose of life is to give and give is to proceed into the next clue. In my case I have a disease called Dystonia. Dystonia and Dysphonia are two of the disorders I have been granted. Thus I have a bit of knowledge of how they operate. They are part of the story of life in the bit of the bot. The bot is the story of life in us. The bit is the story of life in us but with an i. The bit is the tiny bit which is the heart of every one of these little bits of life. They have an i and the i is the source of great and utter contempt for life. Thus if that sounds crazy it is. It is because it is a bit and the bit is buying up territory called flesh. They do it to take the body into the next level of suffering.

The bit is the process of growth and growth is the source of a bit called a probe. The probe is bit into a tiny portion and it is part of the bit in us. We call it tiny but it is not. Not in comparison to the bot or the tiny bit of flesh called a microbe. The probe is part of the mic and part of the robe and it is an interferon type creature called Interfer. The interfer is the spirit which carries in pain with t and the t is the representation of time. It is the cross time to take a point of life from part a to part b. It is the part of life which is the part of life called sea and son. It is the part of the spirit world and part of the ten most wanted of all evil things in the known.

The known isn't just us but all of earth. The known is a bit of time and that is the time it takes for Interfer to reach a paint trail. The paint trail is the slime it uses to coat our life. It does this knowing it will glue down a zillion other bits of life and those bits to other bits until there is a lump called cancer in that spot.

Men of this age forget that God is still the God of simplicity. They think they have the answer. They do in the natural but they forget the inter and the play of life. It is the gift of those who read this to know I found the answer by the gift of prayer and what seemed to be chance. Yet it was part of the Lord who gave me insight while fighting in the spirit. I had asked "Why do some spirits have the ability to make us sick?"

It happened that I wanted to know what I could do to fight against a spirit in the natural. I wanted to know because I saw if we as men were under their power and could not fight then we might just as well give up the fight. I believed and believe God knows ways of fighting these spirit foes in the natural ways of things that grow on the earth.

It isn't that I am advocating a path to life without God. That is the last thing I want to do. But if I could find a way of defeating the course of life and death in a spiritual way maybe people might listen. Maybe. It could go out of my hands but I believe God is the source of correct and utter pain nature in life and in death with life. In other words no one out there need know it is a man who fights but if they throw out God I will get awful upset. So know if you want to fight then send me a contribution so I can keep finding the secret to life.

Now the probe is a bill of pain and time. It is that which cloaks and then stabs the men who search for it in their life and time. It is a spirit so malevolent some might say it has to be the Devil himself. Though a friend to the Devil and to Sin he is not any of them known to men. He is a spirit I found in life. A spirit which is given to me as gift of time. Not in the sense of given to me with his power but with power over him in the power of prayer. I know who he is and I can trace his work by the paint and the slime he covers everything with. He is a cloaker and a painter but in a way that is bad for the body. He is Interfer and that is the closest I've come to his true name.

Interfer has a history of interest but I will give it in brief. He is a built in spirit which is born in us at birth. Some may not like that but it is a bill of life which was given us by the tree of knowledge via the tree of life. It was part of the infiltration which was happening when life was taken out of the garden. God found it later but it was too late to fix. It is a knowledge bit and it is the only one that is known. That means it is aware and it is the

one who is the worst and most malevolent of all things found.

Now if you are in Christ you have an advocate to fight this. If you are in the world you are under its power. It is this which is why I give you a bit of knowledge to fight it. A bit called time. I go into it for various reasons but also because I know it is the source of gunk.

You'll find the majority of people tell you they can prevent much of our problems in life if we only ate more perfect. This is true. People should eat more food that is perfect. However on the face of all earth everything that provides life has this Interfer on the face and the body and the deep of life and fruit. It is the spirit which grows and the spirit which takes. It is a spirit to the body of life and the flesh.

It is an bit and an bot but the bot was an old phrase referring either to the fly or to a bit. The bit was a bot but in the day it was made it was called mic and mic was the sound of tiny theft. People then used microphone type instruments to find tiny things. The tiny things were the bit and the bot and they were the best mics could find then. The mics were the source of sin to some because Sin was the one interested in tiny worlds of play. He had a gift to find tone and the gift of it lead to spirit worlds which were and must be inhabited by everyone. He did discover the first concerted effort of men to find a way of listening to sounds from the deep of the sea. They took mics and placed them on the floor of the sea. Then they found a way to record sound and it became a method of life in the ole ways of life. Then ole was the source of life in the deep and it was called ole because d for death wasn't part of the scare. If death became involved it was of a vegetable and people were not afraid of it.

Thus the bit of life which was sound magnified became the sound of God rustling in the tiny flesh of men. It was the sound of life and it was the gift of people who imagined it.

This was earth then and it was tiny worlds and it was tiny places. It was a world known to most of the known verse but the uni of it was the verses not seen by men. God had a way of carrying the universe to the midst of the sea of life so things could be imagined. It was there in the little bit of flesh that God saw magnificent ideas on how to make tiny and tiny and tiny until finally he created the wealth we call time. Time was the bit of universe in that well but it was Time and time and tiny time that became the solution to the problem being created by the spirit we call Interfer. Now there are those who wanted him called Interfer with on because of the name of it in our world. This is knowledge granted to me by God in order that I might know He grants me clearance to some bit of things. It is this which gives me an opportunity to declare why I chose Interfer over

Interferon.

First the point of inter speaks of the word internal. Internal is the abjective source of life born in us. You and I or me is the way we call ourselves. Our world is totally internal but it is the adjective source of thought. Fully and concertively we point our world to the outside with bit and bot of interference from the spirit world. They interfere with us in everything we do. They are part of their own concentration of evil and bit and bot do their bidding as well. Yet they are on and in us as well. They are part of the fear network which is also part of Inter-fear or interfere. We look at words at different but often the royal connection is the bit on the end of a word. Take ent or ant. They were two of the bits in Eden. One was the ent of the tree and it became the flesh. We bit it and it barked and it became the soul of our existence. We also took the bit and it took itself down to the bee and it became the honey and tiny poll of the bits in the sea of blood. When Christ came and took that ole bit and replaced it with blood of line royal it became life internal but in the spiritual.

The very nature of that is that if our problem is spirit it is spirit which is built up over the on side of life. In other words on is the bitter side of life for those who are able to see out of the internal. They see out into a world filled with their grays. Yet in the graze is the bit of life we graze on and that is grass.

All flesh is grass and all flesh had the portal to the soul of a being called Internal Fear. He was and is a bit of life and holds the line to a being in real life. He is bit into us by a probe which is real. It isn't just on but it is in.

That bit of in is the bit that establishes and holds and concretes itself to the flesh. It does so in more then one way and more then just by holding onto a point. It does so by moving freely between us and the external world by way of spirit probe. The spirit probe is what influences everyone around us. Though there are multitudes of other spirits it is the spirit I call Interfer who is the spirit which is the most power filled of all the lay of time known to men.

I do this by grace and grace is part of the gra word. It is multiplied from the single moan and that singular moan is the bit of creation which groans waiting to be free of sickness. It is the gra word which multiplies into the double moan. It becomes gras and from it is the word we get for grass and from grass we ask why. That leads us to grassy and a word that is like the folk of old in the way we live. Gra Sea or the Sea of Gra. Some might call it simply grace.

In the probe itself is the nature of Interfer and he is a being who is real. He

takes things from men such as life and gives them back only mystery. Why do things not work more than once? Why do diseases seem to change and why are there things called interferences in the world of medicine itself? To answer this with one spirit would bother some but Interfer has one will and that is to destroy the body. He is the course of life in the sea and in the will of men. He can cause men to avert and cause men to lie. He can and does cause things to happen which are called die of service. In my case I came close to it in the season of prayer because of this spirit. It was the only one which coats to the extent every thought becomes a muddle of mud. He is the cause of Alzheimers and most neurological disorders. He is the cause.

Now knowing the cause isn't in the natural should be a sign to rejoice. Most people who are into sickness of a neurological disorder are given drugs which make the body sick if not sicker. The body is not meant to be put on massive drugs or stimulated with our probe into the brain. For those who have gone this way I add it is the will of the father to aid those who are in the world in a way that is to help. He knew Interfer was there but in the sea of this evil world there were things that went unnoticed. Now I say that with grace knowing the heart wants God to receive all glory and honor. I do lay this to his care but He is the one who helps to unveil what is the issue at heart of our disorders in life.

Having these things unveiled now means there is a way to fight. First is to find the probe and the spirit behind it. Then is to find a way to introduce this into the line of Christ. It is also true that being in the natural some will want a cure. With the help of God I will go into it in the natural so doctors who do not want to pray can at least help those who are sick.

Now this spirit does have power and even if Christ overcomes enough to introduce it into the line it will mean that it is not out of power. It has a probe which is able to replicate itself but through an independent source of power. I call it the replicator and it is part of the coating machine of Interfer.

God showed me spirits work together and they work with desire. One is often passive and the other active. In this case there is a passivity based on the slowness of the snail which coats its path with a trail of slime. We see it as a trail on the sidewalk. It vanishes in the day but it is a coat which is there for a time. In a way the snail is the message of time in the replicator. He is part of the story in the probe and it is powered by his gift of replicating things.
