

The Great
May 8, 2008
Joel Akin

Exodus 36:7 For the stuff they had was sufficient for all the work to make it, and too much.

The world will watch. Not as God goes out of his world but as he enters into ours. We will live in a world so crazy. It will be people who will flee. They will write it to you as they leave. They will give it away. They will portion it out to those who are at the gates. This is the will of God.

The point is it is not going to be easy. The way of the future is going to be wild. That will continue for many. Not just weeks or months but years. The wild nature of it will seem as if life is gone insane. All because of one thing; a man prayed.

If you have an idea of prayer then you might concede it is possible. After all if there is too much stuff it is possible there will be sufficient for the work. If it is meant to be the worlds largest university then it will be more then sufficient.

God will take the foolishness of this world and make it wise.

Take for example the idea of a house. Lets say God were to build one. Then imagine it were under the city of Troy. Only Troy was moved.

If that is an example it is one of time. It is also one of Truth. For if it is in Morocco people there would say "That is cool". In a way like them calling on Indiana Jones. They would see it would be a wake up. A call for the one who is not able to break old habits.

All of us have them. I do. I have them everywhere. So God made me a convert. He showed me I was being lost. For if people follow sameness every day they grow old and stale. The way to life is seeking out commercials. Trying things that sound wild. So if there is one wild example try thinking "What is the price of life?" If I go there I do things differently. Yet who is to say it isn't on the books? That is Montana's.

They have a course of life in the sea. They are one example. They go to the sea with life.

I do have a desire to travel there. I have a long drive. The problem isn't. It is. It is me. One who faces trial of time.

I also face a time to wait for body to heal. That will begin. It is something that needs.

Yet if the final hope of home is way out there in Morocco then who is it that will move me from Calgary? Maybe God will just move me and Alberta all the way to Michigan.

That is the way of life in the sea. It is a way of time and time is a way to see.
